The 9th DENTA Head & Neck Ultrasound Course

Following the successful completion of our two-day intermediate-level course endorsed by the European Federation of Societies for Ultrasound in Medicine and Biology (EFSUMB), we are pleased to announce that we will be hosting a similar event again this year in Aarhus, Denmark.

Following the successful completion of our ultrasound course, we are pleased to announce that we will be hosting a similar event again in the beginning of 2027 in Aarhus, Denmark.

The previous course brought together healthcare professionals for an intensive programme of lectures, live demonstrations, and supervised hands-on ultrasound training on models and patients. Participants gained practical knowledge and skills in:

- Understanding the principles of ultrasound and its clinical applications
- Optimising image quality through effective use of ultrasound machine functionalities
- Assessing head and neck pathology using ultrasound
- Performing fine needle aspiration procedures
- Understanding ultrasound-guided radiofrequency therapies

Building on the positive feedback and strong interest from previous attendees, we are excited to offer a similar educational opportunity this year, continuing our commitment to high-quality ultrasound training and professional development.

More details will follow!

Completing the course provides 12.5 European CME credits

Date Created

June 25, 2026
